Some of them seem willing to fight for you, but no matter. Fight you, then, exclusively to save the Union. I issued the Proclamation on purpose to aid you in saving the Union. Still let us not be over sanguins of a spendy, final triumph. Let us be quite sober. Let us diligently apply the means, never doubting that a just God, in his own good time, will give us the rightful result.

Some rebels, aims in muscher, who took the cath of silegiance, and then were received as ambstitutes for drafted men, escaped from the rendezvous st alexandris. Each follow stole a horse and as much other property as he could conveniently carry away.

I have it from the best authority that is it not maded whenever taking it helps us or hurfs the enemy? Armies, the world over, destroy easimies property, when they camnet use it, and even destroy their own to keep it from the enemy. Civilized belligerente do all in their power to help themselves or hurt the enemy, arcept a few things regarded as barbarous or cruel. Among the exceptions are the manacre of vanquished fore, and non-combatants, male and female.

But the Proclamation, as law, either is valid it needs no retraction. If it is valid it cannot be retracted any more than the dead can be brought to life. Some of you profess to think its retraction would operate favorably for the Union. Why better after the spiraction than before the lasse? THE NEW DEMOCRATIC POLICY. THE NEW DEMOCRATIC POLICY.

The "Heads of Meas as" in the Democratic party, seeing there is a prespect that there will be no draft in the State for the present, also perceive that they must create a fresh bug bear in order to excite their followers against the Administration. They must keep up the excitement, or the natural tendency will be for all orderly men and all innest mien, not professional politicians, to fall into the support of the Administration and the country against its enemies. They must have some constantly irritating entheir with which to play upon the bad passions of the masses, the victions or the ignorant of them at least, in order that the party should relain its necessary vitality. All the life that remains now in the Democratic party, is a dasire to obtain power and place, and they ease not what means they resort to in order to obtain them. They are ready, and even bossi, that they will ascrifice the Union to slavery. The only thing that they would socrifice always for would be the Democratic party; but as that dies with slavery any way, there is even no merit to them in this.

But their new cause of irritation is the, and they dwell upon is with an uncelton which as

of the country, as to accede to any such de-mands, the Union and its diberties are inevi-tably fost. After having been detected in war, the rebust and their friends at the North will have triumphed in diplomacy. We must have indemnity for the past and scentriy for the future. We got these from Mexico—a country againing to defined itself against ac-tival invasion. Shall we not get them from tasses who lifted up their bloody, particidal, hands against their own Government, against the Father that bore them? Let the people be not straid to meet the is-sue, which is sure to come. Let the people be a booked to mee' it. These receivment be-put chars they can do any more harm. They must bring forth freits meet for expandance. Why innt a contagt pack as these traitory at the North propose, would be but an ar-mistice, during which their sulles at the fourth could recuperate their versied mar-gies, gather their dispersed forces, as the work thair seems lodges in the bestiger and free deates, and at a bugle call from their leaders span spring to arms.
